Dog treats with a healthy purpose

Daily Calorie Requirements for Dogs

So how many calories does your dog need from all food sources, including dogs treats, in a day? Here is a calorie chart for showing the daily caloric intake for dogs. The low number under “calories per day” is for a dog who gets average exercise; the high number is for an active dog. Please remember that the caloric needs of your pet may differ depending on such factors as lifestyle, genetics, activity level and medical conditions. If you have a dog who is overweight you need to contact your veterinarian and design a program to lower your dog’s calorie intake to help your dog lose weight. Keeping your dog at his/her proper weight can avoid weight related problems such as high blood pressure, heart and respiratory disease, kidney disease, osteoarthritis and Type 2 Diabetes.

Dog’s Weight	Calories Per Day
2 pounds	75-120
5 Pounds	150-240
10 Pounds	250-400
20 Pounds	420-680
30 Pounds	560-920
40 Pounds	700-1,150
50 Pounds	830-1,350
80 Pounds	1,200-1,900
100 Pounds	1,400-2,270

And remember: Because Charlee Bear Dog Treats only contain 3 calories per treat, you can treat your dog more often!
